Directors' Report

The Directors of your Company are pleased to present the Annual Report with the audited financial statements of **Bhanero Textile Mills Limited** for the year ended June 30, 2013.

Financial Performance at a Glance

Overview

By the blessing of Allah Al Mighty, company earned profit of PKR 586.996 Million during the year ended 30th June 2013.

Earnings per share of company are PKR 195.67 per share, resulting in even more value for the shareholders.

By the grace of Al-Mighty Allah your company during the financial year ended 30th June 2013 maintained the position among the market leaders both in domestic and international markets.

Textile sector and Economic Overview

Domestically Pakistan is facing the problems of shortage of electricity, gas and the deteriorating law and order situation. The unscheduled and scheduled load shedding along with increasing rates of gas and electricity have obstructed the viability of the textile industry as the exporters are unable to meet their commitments. In addition our exports confined to raw materials to the global textile buyers and the same raw material comes back to the domestic market in form of finished value-added textile product. The capacity utilization in textile sector is only 60 percent.

Textiles is the most important manufacturing sector of Pakistan and has the longest production chain, with inherent potential for value addition at each stage of processing, from cotton to ginning, spinning, fabric, processing, made-ups and garments. The sector contributes nearly one-fourth of industrial value-added, provides employment to about 40 percent of industrial labour force, consumes more than 40 percent of banking credit to manufacturing sector and accounts for 8 percent of GDP. Except for seasonal and cyclical fluctuations, textile products have maintained an average share of about 60 percent in national exports. However, despite being the 4th largest producer and 3rd largest consumer of cotton globally, Pakistan's comparative advantage is largely pre-empted by low value added exports as reflected in country's 12th rank in world textiles exports.

Economic developments in financial year 2012-2013 are unfolding along broadly similar lines as financial year 2011-2012 but with deepening concerns about sustainability and the adequacy of foreign reserves. The economic situation weakened in the first half of financial year 2012-2013 as official reserves declined markedly, food and general inflation both reaccelerated in January 2013 following their earlier decline, and exports stagnated while imports contracted.

Higher inflation in the country is another major cause of concern. This was mainly due to rising commodity prices, weakening of the rupee due to declining in foreign exchange reserve. Cost of production is increasing day by day due to higher inflation and affecting the competitiveness in international market.

Operating Results and Profit Appropriation

Your company continued to perform well despite hardest business and economic conditions and posted profit before taxation for the year ended 30th June 2013 PKR 620.706 Million (30th June 2012: PKR 366.131 Million). BHANERO TEXTILE MILLS LIMITED

Health, Safety & Environment

The health and safety of our employees, the safety of our assets and the security of our operations always remain among the top priorities of the Company. The industry we operate in demands excellence in safety management and procedures. This is why safety is not only at the core of our sustainability efforts but at the core of our business. Safety is an all-encompassing priority for the Company, from the Board down to the business units. Due these controls and with the blessing of Al-Mighty Allah no major accidents or incidents took place at the business units.

Company always ensures environment preservation and adopts all the possible means for environment protection. We have been taking various steps to ensure minimal dust and emission from our plant and our production lines are installed with pollutant trapping and suppression systems to control dust particles and other emissions.

Human Resources

The Company has employed experienced and qualified human resources to meet the challenges ahead. Company also plans to strengthen its team, use employee performance evaluation methods to further strengthen organization structure and effectiveness. Corporate Social Responsibility

Company is working positively to raise the educational, health and environmental standards of the country in general and local communities in particular. Company is extensively supporting educational and health projects with renowned NGO chartered by Government of Pakistan. Company spent PKR 1.325 million under social commitments during the year. The company worked closely with NGO to support their programs for Health and Education to provide socio-economic opportunities to a multitude of individuals and households.

Business Risks, Challenges and Future Outlook

Major threat for textile industry is power disruption due to shutdown of electricity and gas. It is one of the main causes of under utilization of textile capacity of country. During the shutdown of gas supply, machineries are operated through electricity generated from furnace oil which is not cost effective and causes in increase in production cost.

The Cotton Crop Assessment Committee (CCAC) has estimated for 2013-14 that total production of the local industry is about 12 million bales of cotton. The estimated consumption for 2013-14 of local industry is around 14.0 million bales, showing a shortfall of about 2 million bales. The local industry will have to import about 2 million (480 lb) bales to meet the domestic requirements. Currently the price of cotton in local market is around PKR 7,000 per maund.

U.S. Department of Agriculture (USDA) estimates consumption for 2013-14 is about to increase by 2 percent following the 4 percent growth experienced in 2012-13. Despite the projected rebound in 2013-14, the consumption forecast remains one of the lowest of the past decade, as competition with manmade fibers keeps cotton mill use from growing faster as the global economy expands. The top four cotton-spinning countries-China, India, Pakistan, and Turkey-are forecast to account for a combined 70 percent of the world's cotton mill use in 2013-14, below both last season and the 2009-11 season average.

Based on above it is expected that the prices of cotton would be moderate in both local and international markets in the coming quarter.

The enhancement in discount rate by State Bank of Pakistan by 50 bps has impacted the economy negatively. The State Bank of Pakistan should consider to keep the discount rate at a minimum possible level in order to facilitate the manufacturer to boost the economy.

The results of the First Quarter of the next fiscal year will depend on the direction of cotton prices and corresponding yarn and fabric prices. However the management expects a moderate profitability in subsequent period

Acknowledgement

Your directors extended their appreciation to the company's bankers, valued customers, suppliers, shareholders and government authorities for the cooperation extended by them during this period. Your directors also appreciate the efforts of the company's executives, managers, technicians and workers who have worked devotedly and achieve the targets set before them.

REVIEW REPORT TO THE MEMBERS

On the Statement of Compliance with Best Practices of the Code of Corporate Governance

We have reviewed the statement of compliance with the best practices contained in the Code of Corporate Governance prepared by the Board of Directors of **Bhanero Textile Mills Limited** to comply with the Listing Regulations of the Karachi Stock Exchange Limited, Lahore Stock Exchange Limited and Islamabad Stock Exchange Limited, where the company is listed.

The responsibility for compliance with the Code of Corporate Governance is that of the Board of Directors of the company. Our responsibility is to review, to the extent where such compliance can be objectively verified, whether the statement of compliance reflects the status of the company's compliance with the provisions of the Code of Corporate Governance and report if it does not. A review is limited primarily to inquiries of the company personnel and review of various documents prepared by the company to comply with the Code.

As part of our audit of the financial statements we are required to obtain an understanding of the accounting and internal control system sufficient to plan the audit and develop an effective audit approach. We have not carried out any special review of the internal control system to enable us to express an opinion as to whether the Board's statement on internal control covers all controls and the effectiveness of such internal controls.

Further, the Listing Regulations of Karachi Stock Exchange Limited, Lahore Stock Exchange Limited and Islamabad Stock Exchange Limited require the Company to place before the Board of Directors for their consideration and approval, related party transactions distinguishing between transactions carried out on terms equivalent to those that prevail in arm's length transactions and transactions which are not executed at arm's length price recording proper justification for using such alternate pricing mechanism. Further, all such transactions are also required to be separately placed before the Audit Committee. We are only required and have ensured compliance of requirement to the extent of approval of related party transactions by the Board of Directors and placement of such transactions before the Audit Committee. We have not carried out any procedures to determine whether the related party transactions were undertaken at arm's length price or not.

Based on our review, nothing has come to our attention which causes us to believe that the Statement of Compliance does not appropriately reflect the company's compliance, in all material respect, with the best practices contained in the Code of Corporate Governance as applicable to the company for the year ended June 30, 2013.

BHANERO TEXTILE MILLS LIMITED

Notes to the financial statement For the year ended June 30, 2013

1 THE COMPANY AND ITS OPERATIONS

- 1.1 Bhanero Textile Mills Limited ("the Company") was incorporated on 30th March 1980 as a public limited company in Pakistan under Companies Ordinance, 1984 and is quoted on all stock exchanges of Pakistan. The registered office of the Company is located at Umer House, 23/1, Sector 23, S. M. Farooq Road, Korangi Industrial Area Karachi.
- 1.2 The company is principally engaged in manufacturing and sales of yarn and fabric. The production facilities are located at Kotri, District Dadu in the province of Sindh and Feroz Watwan, District Sheikhpura in the province of Punjab.

2 BASIS OF PREPARATION

2.1 Statement of compliance

These financial statements have been prepared in accordance with approved accounting standards as applicable in Pakistan. Approved accounting standards comprise of such International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board as are notified under the Companies Ordinance, 1984 provisions of and directives issued under the Companies Ordinance, 1984. In case requirements differ, the provisions of and directives of the Companies Ordinance, 1984 shall prevail.

2.2 Basis of measurement

These financial statements have been prepared on the historical cost basis except for derivative financial instruments that are stated at fair value.

2.3 Functional and presentation currency

These financial statements are presented in Pakistani Rupees which is also the company's functional currency. All financial information presented in Pakistani Rupees has been rounded to the nearest Rupee.

2.4 Use Of Estimates And Judgments

The preparation of financial statements in conformity with approved accounting standards, as applicable in Pakistan, requires management to make judgments, estimates and assumptions that affect the application of policies and the reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Judgments made by the management in the application of approved accounting standards, as applicable in Pakistan, that have significant effect on the financial statements and estimates with a significant risk of material adjustment in the next year are discussed in note 45 to these financial statements.

2.5 Standards, interpretations and amendments to published approved accounting standards

2.5.1 Standards, interpretations and amendments to published approved accounting standards that are effective in the current year

During the year, the following standards, amendments to standards and interpretations including amendments to interpretations became effective, however, the application of these amendments and interpretations did not have material impact on the financial statements of the Company:

Standards, interpretations and amendments	Description
Amendments to IAS 1 - Presentation of Financial Statements – Presentation of Items of Other Comprehensive Income	The amendments to IAS 1 change the grouping of items presented in other comprehensive income (OCI). Items that could be reclassified (or recycled) to profit or loss at a future point in time (for example, net gains on hedges of net investments, exchange

BHANERO TEXTILE MILLS LIMITED

Notes to the financial statement
For the year ended June 30, 2013

Standards, interpretations and amendments

Description

differences on translation of foreign operations, net movements on cash flow hedges and net losses or gains on available-for-sale financial assets) would be presented separately from items that will never be reclassified (for example, actuarial gains and losses on defined benefit plans). Income tax on items of other comprehensive income is required to be allocated on the same basis i.e. the amendments do not change the option to present items of other comprehensive income either before tax or net of tax. The amendments require retrospective application. The amendment is effective for annual periods beginning on or after July 01, 2012.

2.5.2 Approved accounting standards, interpretations and amendments thereto issued but not effective as at the reporting date

The following standards, interpretations and amendments are in issue which are not effective as at the reporting date.

Standards, interpretations and amendments

Amendments to IAS 16 - Property, Plant and Equipment
– Classification of servicing equipment

Description

This improvement clarifies that major spare parts and servicing equipment that meet the definition of property, plant and equipment are not inventory. The standard is effective for annual periods beginning on or after January 01, 2013.

Amendments to IAS 19 - Employee Benefits

The amendments eliminate the corridor approach and therefore require an entity to recognize changes in defined benefit plans obligations and plan assets when they occur. All actuarial gains or losses arising during the year are recognized immediately through other comprehensive income. The amendments also require additional disclosures and retrospective application with certain exceptions. The application of the amendments to IAS 19 would result in the recognition of cumulative unrecognized actuarial loss in other comprehensive income in the period of initial application. The standard is effective for annual periods beginning on or after January 01, 2013.

Amendments to IAS 32 Financial Instruments:
Presentation - Tax effects of distributions to holders of an equity instrument, and transaction costs of an equity transaction

This improvement clarifies that income taxes arising from distributions to equity holders are accounted for in accordance with IAS 12 Income Taxes. The standard is effective for annual periods beginning on or after January 01, 2013.

Amendments to IAS 32 Financial Instruments:
Presentation - Offsetting financial assets and financial liabilities

These amendments clarify the meaning of “currently has a legally enforceable right to set-off”. It will be necessary to assess the impact to the entity by reviewing settlement procedures and legal documentation to ensure that offsetting is still possible in cases where it has been achieved in the past. In certain cases, offsetting may no longer be achieved. In other cases, contracts may have to be renegotiated. The requirement that the right of set-off be available for all counterparties to the netting agreement may prove to be a challenge for contracts where only one party has the right to offset in the event of default. The standard is effective for annual periods beginning on or after January 01, 2014.

Amendments to IAS 34 - Interim Financial Reporting -
Interim reporting of segment information for total assets and total liabilities

The amendment aligns the disclosure requirements for total segment assets with total segment liabilities in interim financial statements. This clarification also ensures that interim disclosures are aligned with annual disclosures. The standard is effective for annual periods beginning on or after January 01, 2013.

BHANERO TEXTILE MILLS LIMITED

Notes to the financial statement For the year ended June 30, 2013

Standards, interpretations and amendments

Amendments to IFRS 7 Financial Instruments:
Disclosures - Offsetting financial assets and financial liabilities

Description

These amendments require an entity to disclose information about rights to set-off and related arrangements (e.g., collateral agreements). The disclosures would provide users with information that is useful in evaluating the effect of netting arrangements on an entity's financial position. The new disclosures are required for all recognised financial instruments that are set off in accordance with IAS 32 Financial Instruments: Presentation. The disclosures also apply to recognised financial instruments that are subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are set off in accordance with IAS 32. The amendment is effective for annual periods beginning on or after January 01, 2013.

IFRIC 20 - Stripping Costs in the Production Phase of a Surface Mine

"This interpretation applies to waste removal (stripping) costs incurred in surface mining activity, during the production phase of the mine. The interpretation addresses the accounting for the benefit from the stripping activity. The amendment is effective for annual periods beginning on or after January 01, 2013."

2.5.3 Securities and Exchange Commission of Pakistan through SRO 182(I)/2013 dated 4th March 2013 has amended the requirements of 4th Schedule of the Companies Ordinance 1984. The amendments require some additional disclosure and modification of existing disclosure.

3 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

3.1 Borrowings

Mark-up bearing borrowings are recognized initially at cost, less attributable transaction cost. Subsequent to initial recognition, mark-up bearing borrowings are stated at amortized cost with any difference between cost and redemption value being recognized in the income statement over the period of the borrowings on an effective interest basis.

3.2 Employee benefits

Short term employees benefits

The company recognizes the undiscounted amount of short term employee benefits to be paid in exchange for services rendered by employees as a liability after deducting amount already paid and as an expense in profit or loss unless it is included in the cost of inventories or property, plant and equipment as permitted or required by the approved accounting standards. If the amount paid exceeds the undiscounted amount of benefits, the excess is recognized as an asset to the extent that the prepayment would lead to a reduction in future payments or cash refund.

The Company provides for compensated absences of its employees on unavailed balance of leaves in the period in which the leaves are earned.

Post retirement benefits

Defined benefit plans

The Company operates an unfunded gratuity scheme (defined benefit plan) for all its permanent employees who have completed minimum qualifying period of service as defined under the respective scheme. Liability is adjusted annually to cover the obligation and the adjustment is charged to profit or loss. The determination of the Company's obligation under the scheme requires assumptions to be made of future outcomes, the principal ones being in respect of increases in remuneration, expected average remaining working lives of employees and discount rate used to derive present value of defined benefit obligation.

Amounts recognized in the balance sheet represent the present value of the defined benefit obligation as adjusted for unrecognized actuarial gains and losses and unrecognized past service cost.

Actuarial gains and losses are recognized in profit or loss for the period in which these arise.

Notes to the financial statement For the year ended June 30, 2013

3.3 Taxation

Income tax expense comprises current tax and deferred tax. Income tax expense is recognized in profit or loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity.

Current

Current tax is the amount of tax payable on taxable income for the year, using tax rates enacted or substantively enacted by the reporting date, and any adjustment to the tax payable in respect of previous years. Provision for current tax is based on higher of the taxable income at current rates of taxation in Pakistan after taking into account tax credits, rebates and exemptions available, if any, or minimum of turnover. However, for income covered under final tax regime, taxation is based on applicable tax rates under such regime. The amount of unpaid income tax in respect of the current or prior periods is recognized as a liability. Any excess paid over what is due in respect of the current or prior periods is recognized as an asset.

Deferred

Deferred tax is accounted for using the balance sheet liability method providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for tax purposes. In this regard, the effects on deferred taxation of the portion of income that is subject to final tax regime is also considered in accordance with the requirement of "Technical Release - 27" of the Institute of Chartered Accountants of Pakistan. Deferred tax is measured at rates that are expected to be applied to the temporary differences when they reverse, based on laws that have been enacted or substantively enacted by the reporting date. A deferred tax liability is recognized for all taxable temporary differences. A deferred tax asset is recognized for deductible temporary differences to the extent that future taxable profits will be available against which temporary differences can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Deferred tax is not recognized for timing differences that are not expected to reverse and for the temporary differences arising from the initial recognition of goodwill and initial recognition of assets and liabilities in a transaction that is not a business combination and that at the time of transaction affects neither the accounting nor the taxable profit.

3.4 Provisions

A provision is recognized in the balance sheet when the company has a legal or constructive obligation as a result of past events, and it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

3.5 Trade and other payables

Liabilities for trade and other amounts payable are recognized and carried at cost, which is the fair value of the consideration to be paid in the future for goods and services received, whether or not billed to the company.

3.6 Dividend

Dividend is recognized as a liability in the period in which it is approved by shareholders.

3.7 Property, plant and equipment and depreciation

Owned assets

Property, plant and equipment, except freehold and leased hold land and capital work-in-progress are stated at cost less accumulated depreciation and impairment losses, if any. Freehold land and capital work-in-progress are stated at cost.

Subsequent cost

The cost of replacing part of an item of property, plant and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the company and its cost can be measured reliably. The carrying amount of the replaced part is derecognized. The costs of the day-to-day servicing of property, plant and equipment are recognized in profit or loss as incurred.

Depreciation

Depreciation is charged to income on reducing balance method over its estimated useful life at the rates specified in property, plant and equipment note except for equipment and other assets. Equipment and other assets are depreciated

BHANERO TEXTILE MILLS LIMITED

Notes to the financial statement For the year ended June 30, 2013

over the period of three years. Depreciation on additions to property, plant and equipment is charged from the month in which an item is acquired or capitalized while no depreciation is charged for the month in which the item is disposed off.

The assets' residual values and useful lives are reviewed at each financial year end and adjusted if impact on depreciation is material.

The gain or loss on disposal of an asset represented by the difference between the sale proceeds and the carrying amount of the asset is recognized as an income or expense.

Impairment

Where the carrying amount of asset exceeds its estimated recoverable amount it is written down immediately to its recoverable amount.

Leased assets

Leases in terms of which the company assumes substantially all the risks and rewards of ownership are classified as finance lease. Asset acquired by way of finance lease is stated at an amount equal to the lower of its fair value and the present value of minimum lease payments at the inception of the lease less accumulated depreciation and impairment losses, if any. Depreciation is charged on the same basis as used for owned assets.

Financial charges are allocated to accounting period in a manner so as to provide a constant rate of charge on outstanding liability.

3.8 Capital work in progress

Capital work in progress and stores held for capital expenditure are stated at cost and represents expenditure incurred on property, plant and equipment during construction and installation. Cost includes borrowing cost as referred in accounting policy of borrowing cost. Transfers are made to relevant property, plant and equipment category as and when assets are available for use.

3.9 Investments

Investment available for sale

Investment available for sale are initially recognized at fair value plus attributable transactions costs. Subsequent to initial recognition these are measured at fair value, with any resultant gain or loss being recognized in equity through comprehensive income. Gains or losses on available-for-sale investments are recognized in equity through comprehensive income until the investments are sold or disposed off, or until the investments are determined to be impaired, at that time cumulative gain or loss previously reported in the equity is included in current year's profit and loss account.

3.10 Derivative financial instruments

The Company enters into derivative financial instruments, which include future contracts. Derivatives are initially recorded at cost and are remeasured to fair value on subsequent reporting dates. The fair value of a derivative is the equivalent of the unrealized gain or loss from marking to market the derivative using prevailing market rates. Derivatives with positive market values (unrealized gains) are included in other receivables and derivatives with negative market values (unrealized losses) are included in other liabilities in the balance sheet. The resultant gains and losses from derivatives held for trading purposes are included in income currently. No derivative is designated as hedging instrument by the Company.

3.11 Stores and spares

Stores and spares are valued at lower of cost and net realizable value. Cost is determined on a weighted average basis. Items in transit are valued at cost comprising invoice value plus other charges incurred thereon.

3.12 Stock-in-trade

Stock-in-trade is stated at the lower of cost and net realizable value except waste which is valued at net realizable value. Cost is determined as follows;

Raw material	At weighted average cost or replacement cost which ever is lower
Work in progress	At average manufacturing cost
Finished goods	At average manufacturing cost or net realisable value which ever is lower
Waste	Net realizable value

BHANERO TEXTILE MILLS LIMITED

Notes to the financial statement For the year ended June 30, 2013

Valuation of raw material, work in process and finished goods as on 30th June 2013 have been valued at lower of cost and net realizable value as per the requirement of IAS 2.

Average manufacturing cost in relation to work in process and finished goods, consist of direct material and proportion of manufacturing overheads based on normal capacity.

Net realizable value is the estimated selling price in the ordinary course of business less costs of completion and selling expenses.

3.13 Trade debts and other receivables

These are carried at original invoice amount less provisions for any uncollectible amount. An estimate is made for doubtful receivables when collection of the amount is no longer probable. Debts considered irrecoverable are written off.

3.14 Cash and cash equivalents

Cash and cash equivalents comprise cash balances, cash in transit and balances with bank for the purpose of cash flow statement.

3.15 Revenue recognition

Revenue from sales is recognized when significant risks and rewards of ownership are transferred to the buyer.

Interest income is recognized on the basis of constant periodic rate of return.

Dividend income is recognized when the right to receive dividend is established i.e. the book closure date of the investee company declaring the dividend.

3.16 Borrowing costs

Borrowing costs incurred on long term finances directly attributable for the construction / acquisition of qualifying assets are capitalized up to the date, the respective assets are available for the intended use. All other mark-up, interest and other related charges are taken to the profit and loss account currently.

3.17 Impairment

All company's assets are reviewed at each balance sheet date to determine whether there is objective evidence of impairment. If any such indication exists, the assets' recoverable amount is estimated. Impairment losses are recognized in the profit and loss account currently.

3.18 Foreign currency translation

Foreign currency transactions are translated into Pak Rupees at exchange rates prevailing on the date of transaction. Monetary assets and liabilities in foreign currencies are retranslated into Pak Rupees at the rates of exchange prevailing at the balance sheet date.

Exchange differences, if any, are taken to profit and loss account.

3.19 Offsetting of financial assets and financial liabilities

Financial assets and financial liabilities are set off and only the net amount is reported in the balance sheet when there is a legally enforceable right to set off the recognized amount and the company intends to either settle on a net basis, or to realize the asset and settle the liability simultaneously.

3.20 Transactions with related party

Transactions with related parties are priced at comparable uncontrolled market price. All transactions involving related parties arising in the normal course business are conducted at arm's length using valuation modes, as admissible. Parties are said to be related when they meet the definition as provided in the Companies Ordinance 1984.

3.21 Segment reporting

43 FINANCIAL INSTRUMENTS AND RELATED DISCLOSURES

Fair value of financial instruments

Fair value is the amount for which an asset could be exchanged, or a liability settled between knowledgeable willing parties in an arms length transaction. As at June 30, 2013 the net fair value of all financial instruments has been based on the valuation methodology outlined below:-

Long-term deposits

Long term deposits does not carry any rate of return. The fair value of it has been taken at book value as it is not considered materially different and readily exchangeable.

Non-current liabilities

For all non-current liabilities the fair values have been taken at book values as these are not considered materially different based on the current market rates of return and reprising profiles of similar non-current liabilities.

Other financial instruments

The fair values of all other financial instruments are considered to approximate their book values as they are short term in nature.

The analysis of yield / mark-up rate risk is as under:

43.1 Interest rate risk management

Interest rate risk arises from the possibility that changes in interest rates will affect the value of financial instruments. Changes in interest rates can affect the rates charged on interest bearing liabilities. This can result in an increase in interest expense relative to financial borrowings or vice versa. The Company manages its risk by interest rate swapping, maintaining a fair balance between interest rates and financial assets and financial liabilities. The effective interest rates for the monetary financial assets and liabilities are mentioned in respective notes to the financial statements.

43.2 Credit risk and concentration of credit risk

Credit risk represents the accounting loss that would be recognized at the reporting date if counter parties fail to perform as contracted. Out of the total financial assets of PKR 541,886,215 (June 30, 2012: PKR 469,924,050), unsecured local trade debts, advances to suppliers, and other receivables amounting in aggregate to PKR 448,827,619 (June 30, 2012: PKR 403,691,148) are subject to credit risk. The Company manages its credit risk by; limiting significant exposure to any individual customers and obtaining advance against sales.

43.3 Liquidity risk

Liquidity risk reflects the Company's inability in raising funds to meet commitments. The management closely monitors the Company's liquidity and cash flow position. This includes maintenance of balance sheet liquidity ratios, debtors and creditors concentration both in terms of the overall funding mix and avoidance of undue reliance on large individual customer.

BHANERO TEXTILE MILLS LIMITED

Notes to the financial statement For the year ended June 30, 2013

43.4 Foreign exchange risk management

Foreign currency risk arises mainly where receivables and payables exist due to transactions in foreign currencies. As at June 30, 2013, the total foreign currency risk exposure was PKR 32,486,325 (June 30, 2012: PKR 85,635,554) in respect of foreign trade debts.

43.5 Fair value of financial instruments

"Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arms' length transaction.

The carrying values of all financial assets and liabilities reflected in the financial statements approximate their fair values."

43.6 Credit risk

43.6.1 Maximum credit exposure

The carrying amount of financial assets, excluding cash in hand, represents maximum credit exposure. The maximum exposure to credit risk as at the reporting date is:

<i>Note</i>	June 30, 2013 Rupees	June 30, 2012 Rupees

Notes to the financial statement For the year ended June 30, 2013

June 30, 2013
Rupees

June 30, 2012
Rupees

The movement in allowance for impairment in respect of loans and receivables during the year is as follows:

As at beginning of the year	40,826,444	47,445,616
Impairment loss recognized	36,052,301	1,832,728
Impairment loss reversed	(150,000)	(8,451,900)
As at end of the year	<u>76,728,745</u>	<u>40,826,444</u>

Credit quality of counter parties is assessed based on historical default rates. All loans and receivables not past due are considered good. The management believes that allowance for impairment of loans and receivables past due is not necessary, as these comprise amounts due from old customers, which have been re-negotiated from time to time and are also considered good.

43.6.4 Collateral held

The Company does not hold collateral to secure its loans and receivables. However, foreign trade receivables of the Company are secured through letters of credits and exposure to credit risk in respect of these is minimal.

43.7 Liquidity risk

BHANERO TEXTILE MILLS LIMITED

Notes to the financial statement For the year ended June 30, 2013

	June 30, 2013 Rupees	June 30, 2012 Rupees
43.8 Market risk		
43.8.1 Currency risk		
The Company's exposure to currency risk as at the reporting date is as follows:		
Trade receivables	26,679,837	80,082,472
Cash and cash equivalents	5,806,488	5,553,082
Total exposure	<u>32,486,325</u>	<u>85,635,554</u>

All foreign currency balances are denominated in USD. Average exchange rate used during the year and spot exchange rate applied at the reporting date was PKR 99.25 / USD (2012: PKR 89.64 / USD and PKR 94.40 / USD) respectively. Spot exchange rate for foreign currency balances under usance letter of credit applied at the reporting date was PKR 96.3228 / USD (2012: PKR 91.63 / USD).

A ten percent appreciation in Rupee would have decreased profit or loss by PKR 3,248,633 (2012: PKR 8,563,555). A ten percent depreciation would have had the equal but opposite effect on profit or loss. This sensitivity analysis based on assumption that all variables, with the exception of foreign exchange rates, remain unchanged.

43.8.2 Interest rate risk

The interest rate profile the Company's interest bearing financial instruments as at the reporting date is as follows:

	June 30, 2013 Rupees	June 30, 2012 Rupees
Fixed rate instruments		
Financial assets	-	-
Financial liabilities	-	-
Variable rate instruments		
Financial assets	25,094,654	18,544,654
Financial liabilities	830,249,570	701,542,375

The Company is not exposed to interest rate risk in respect of its fixed rate instruments. A 100 basis points increase in variable interest rates would have decreased profit or loss by PKR 8,302,496 (2012: PKR 7,015,424). A 100 basis points increase in variable interest rate would have had an equal but opposite impact on profit or loss.

43.9 Fair values

Fair value is the amount for which an asset could be exchanged or a liability be settled between knowledgeable willing parties, in an arm's length transaction. As at the reporting date, the fair values of all financial instruments are considered to approximate their book values.

44 TRANSACTIONS WITH RELATED PARTIES

The associated undertaking and related parties comprise associated companies, directors and key management personnel. Transaction with associated undertakings and related parties, other than remuneration and benefits to key management personnel under the term of their employment as disclosed in note 8.2.1, 9.1 and 37 are as follow :

45 Accounting Estimates and Judgments

45.1 Income taxes

In making the estimates for income taxes currently payable by the Company, the management looks at the current income tax law and the decisions of appellate authorities on certain issues in the past.

45.2 Investment stated at fair value

Management has determined fair value of certain investments by using quotations from active market conditions and information about the financial instruments. These estimates are subjective in nature and involve some uncertainties and matters of judgment (e.g. valuation, interest rate, etc.) and therefore, cannot be determined with precision.

45.3 Property, plant and equipment

The Company reviews the rate of depreciation, useful life, residual value and value of assets for possible impairment on an annual basis. Any change in the estimates in future years might affect the carrying amounts of the respective items of property, plant and equipments with a corresponding affect on the depreciation charge and impairment.

45.4 Stock-in-trade and stores and spares

The Company reviews the net realizable value of stock-in-trade and stores and spares to assess any diminution in the respective carrying values. Any change in the estimates in future years might affect the carrying amounts of stock-in-trade and stores and spares with a corresponding affect on the amortization charge and impairment. Net realizable value is determined with respect to estimated selling price less estimated expenditures to make the sales.

45.5 Interest rate and cross currency swap

"The Company has entered into various interest rates and cross currency swap over the last year. The calculation involves use of estimates with regard to interest and foreign currency rates which fluctuate with the market forces."
